

**The basic measurement  
of time in Atlantis  
is a day**

**An Atlantian day is  
divided into Schlibs  
and Ponks**

**The length of the  
Zin is 50ft**

**The height of the  
Zin is 100ft**

**The Zin is built of  
stone blocks**

**The width of the  
Zin is 10ft**

**Each block is  
one cubic foot**

**Day 1 in the  
Atlantian week is  
Aquaday**

**Day 2 in the Atlantian  
Week is called  
Neptiminus**

**Day 3 in the Atlantian  
Week is called  
Sharkday**

**Day 4 in the Atlantian  
week is called  
Mermaidday**

**Day 5 in the Atlantian  
week is called  
Daydoldrum**

**There are five days  
in the Atlantian week**

**The working day  
has 9 Schlibs**

**Each worker takes rest  
periods during the  
working day totalling  
16 ponks**

**There are 8 Ponks  
in a Schlib**

**Workers each lays  
150 blocks per Schlib**

**At any time when work is taking place there is a gang of 9 people on site**

**One member of each  
gang has religious duties  
and does not lay blocks**

**No work takes place  
on Daydoldrum**

# What is a Cubitt?

**A Cubitt is a cube,  
all sides of which measure  
1 Megalithic yard**

**There are 3.5 feet in a  
Megalithic Yard**

**Does work take place  
on Sunday?**

# What is a Zin?

**Which way up  
does the Zin stand?**

**The Zin is made of  
green blocks**

**Green has a special  
Religious significance on  
Mermaidday**

**Each gang includes  
two women**

**Work starts at  
daybreak on Aquaday**

**Only one gang is  
working on the  
construction of the Zin**

**There are 8 gold scales  
in a gold fin**

**Each block costs  
two gold fins**
